

Ritchey WCS EGP Locking Griffe

Ritchey WCS EGP Locking Griffe

Tom Ritchey's latest grip design features a single-sided locking function with a helix core, tightening itself and distributing clamping force over the entire length of the grip. This ensures the grip stays put, even under the heaviest twisting forces that would make other grips slip. The dual-density compound of these unique grips ensures a comfortable and secure feel, and due to their innovative design and lightweight construction, these
